**GOLD NUTRIENT:** It's the most powerful results driven nutrient system in the world – bar none! Performance is our obsession and GOLD NUTRIENT is the breathtaking result. Never before has a nutrient been developed this powerful. GOLD NUTRIENT has taken us 6 long years to develop but it's been worth the wait. Throughout our extensive testing phase over the past 12 months GOLD NUTRIENT has broken all the records and created more hype and more excitement than any nutrient ever has. Why? Because GOLD NUTRIENT outguns, outperforms and outyields the competition by such a ridiculously huge margin that it's embarrassing! Everyone, absolutely everyone, who's tested GOLD NUTRIENT or seen it in action, is left speechless! GOLD NUTRIENT has scared the competition so much that one large competitor hastily threw together a poor copy to try and get some sales before it's too late! GOLD NUTRIENT is an easy to use nutrient program and requires nothing else to achieve results that will blow your mind!

### Usage Details:

You demand the best results. You work longer and harder in your garden to stay ahead of the pack. GOLD NUTRIENT is the revolutionary new 2 part nutrient, designed for Hydro, Soil and Coco, that rewards those gardeners who demand the very best. GOLD NUTRIENT's unique ionic technology delivers massive amounts of yield boosting nutrition to your plants. During extensive trials, over a grueling 2 year period, GOLD NUTRIENT outperformed, outyielded and just plain outgunned all of the major brands pitted against it! The closest any of our competitors could get to GOLD NUTRIENT was a mere 70% of our record breaking yields! If you work hard - get serious and get the results you want now, with GOLD NUTRIENT!

For best results, use the online nutrient calculator at [www.dutchmaster.com.au](http://www.dutchmaster.com.au) for an individualized program to suit your needs and download and read the GOLD NUTRIENT training paper. For the following situations use GOLD NUTRIENT at 3/4 recommended strength: For young/immature plants, those using tap water above 100 PPM or those with limited growing periods of 2 weeks or less.

For general usage follow these simple guidelines:

1. Fill your reservoir or tank to 2/3rds of it's capacity.
2. Add the correct amount of GOLD NUTRIENT Part A for your tanks final or total capacity at a rate of 50 milliliters / 3.5 tablespoons per 10 liters / 2.65 gallons, stirring to mix.
3. Add the correct amount of GOLD NUTRIENT Part B for your tanks final or total capacity at a rate of 50 milliliters / 3.5 tablespoons per 10 liters / 2.65 gallons, stirring to mix.
4. Add any permitted additives such as Dutch Master Zone, Max or Silica, stirring to mix before adding the next one. Please remember GOLD NUTRIENT is very powerful and you should not add any bloom boosters, Pk13/14 or nitrogen boosters (kelp, seaweed or guano).
5. Top up your reservoir or tank to its final volume and check the strength using a TDS (PPM or EC) meter. If required, add more GOLD NUTRIENT (one part at a time) in small quantities until you arrive at the correct nutrient strength. If your nutrient solution is too strong then add fresh water until you arrive at the correct strength.
6. Check and adjust pH. 5.5 to 5.8 for Hydro or Coco users. 5.8 to 6.5 for soilless systems such as Promix or Sunshine mix.
7. Feed according to your systems normal requirements.

Finally a nutrient system that delivers outstanding results!!!
